- **VCS Repository:**

Project: <https://github.com/Tame-Name/Android-Application>

Milestones: <https://github.com/Tame-Name/Milestones>

Meeting Notes: <https://github.com/Tame-Name/Meeting-Notes>

• Team Member Contributions from GitHub:

• **Deployment:** The app must be built in Android Studio. To do so, download the project from the Android-Application GitHub repository (above), and build the build.gradle file in Android Studio. After a successful Gradle build, run the app in an adb emulator using Android 8.0.0.

• **Continuous Integration:** The app was tested using Espresso tests on Microsoft App Center. The page requires a login to view, so a screenshot is included below:

<https://appcenter.ms/users/david.gerstle/apps/Picky-Eater-1/test/runs>
